The MetEd Website
www.meted.ucar.edu

COMET’s MetEd website is the portal to a rich, online library of interactive, state of the art, education and training resources for the geosciences. The website includes a registration system that allows users to track their progress in courses and notify supervisors or instructors of quiz results.

There are over 700 hours of materials available to our nearly 300,000 registered users. Topic areas include:

- Aviation
- Climate
- Coastal Weather
- Convective Weather
- Emergency Management
- Fire Weather
- Fog and low stratus
- Hydrology / Flooding
- Mesoscale Meteorology
- Mountain Meteorology
- Numerical Modeling (NWP)
- Oceanography/Marine Meteorology
- QPE/QPF (Precipitation)
- Radar Meteorology
- Satellite Meteorology
- Space Weather
- Tropical/Hurricanes
- Winter Weather

COMET Services

Instructional Design:
Instructional design leads to education and training that works. From needs assessment to gap analysis to curriculum and course development, our instructional design staff create effective learning experiences. We specialize in making technical and scientifically complex content understandable with effective and practical instruction.

Multimedia and Web Development:
Standards compliant web applications, complex learning interactions, content and learning management systems, 3-dimensional graphics, animation and video development – we have the expertise to meet any instructional need.

Instructor-led Courses:
COMET develops and facilitates courses for organizations around the world. Whether the training calls for a face-to-face residence course, webinars, or distance learning, our expert staff provide the planning and facilitation to deliver outstanding and effective learning experiences.
